- EAS technologies: AM (58KHz) or RF (8,2MHz)
- Locking system: Duraltag Lock (patented)
- Packaging: per 100

Compatible detacher:
Duraltag-Lock

IN OPTION: RFID INSIDE

Embedded within the Duraltag device, the RFID+ chip benefits from absolute security both physically (no danger of falling off or deterioration) and in terms of data (no danger of RFID+ data leaving the store).

The embedded RFID+ solution, developed specifically according to ISO standards, benefits from high performance and reliability criterias so as to respond to the most demanding specifications of fashion retailers. A turnkey solution RFID+/Duraltag is completely integrated, enabling stores to generate economic gains simply and rapidly from the supply chain to the payment desk.
